

## Bangkit 2022 Product Capstone Announcement

### FAQ:

- **Why 53 not 50?**  
Because several groups have similar scores. Therefore we need to include more teams. Other teams below these teams are separated with significant differences in score.
- **Are there any Bangkit-Created teams that are included in the top 50?**  
Yes. 3 teams this year. This is decided purely on their score.
- **Are there any teams without Bangkit Partner University Members in the top 50?**  
Yes. 2 teams. 1 team even only consists of 2 people!
- **Are there any teams that are excluded from the top 50 due to team members not attending the presentation or being late?**  
Yes, 2 teams to be exact. Please see below.
- **Why is the theme not balanced?**  
From the start, we inform you that the lowest participation theme **may benefit you** in case you are compared to the same topic. **It also may not.** However we purely based these scoring decisions on your peer review score for fairness purposes. We are not balancing the 50 teams based on the theme composition.
- **For all other teams: Thank you for your participation.** Regarding other inquiries, please contact [capstone@bangkit.academy](mailto:capstone@bangkit.academy).

### Notes for Top-53 teams

- **Congratulations!**
- **All Active Team members of the top 53 teams** are required to attend and participate in additional briefing regarding incubation and continuation of the capstone project - Saturday June 18th 2022, 1-3PM WIB (information will be available on the calendar).
- **Presentation for Top 53 will be held on Monday-Tuesday Jun 20-21th, 2022.**  
This round, you will be presenting in front of a panel of judges with capabilities on Android, Machine Learning, Cloud, Academic Research, and Business (5 person). There will be a 10 min presentation and 5 min Q&A from the panelist. This session is a private session with no facilitators or other cohort attending.
- Top 50 Teams are allowed to create new (or copy & modify) presentations for the top-50 presentation **without changing the original presentation.**  
You are not allowed to edit your code or repository/documentations/project brief file.
